TIMBER SALE INFORMATION

TIM, Gate 3, Create Timber Sale (Prep101)

Sale Area Description:
Primary County Name (FIPS Code): 029 - Flathead *
Sale Area Legal Description (short T & R): T25N, R15W, PMM
Sale Area Legal Description (long):
Portions of Sections 2,3,4,7,8,9,10,11,16,17,18,20,21,22,26,27,28,and PB44,45,46 of T25N, R15W, Flathead County, State of Montana, PMM
The format that the description is entered here and inputted to TIM is exactly the way it will print out in the Contract, Ad and prospectus at Gate 4.
Compartment (s): 62
Environmental Documentation:
Project Association: List NEPA Project(s) that approved the timber sale.
NEPA Document Name Percentage of Sale Volume (CCF)
Spotted Bear River 100
The above NEPA Document(s) shall be included in the Prospectus, General Narrative, TIM Gate 4 - Prospectus (ADVR115). Include the following statement in the Prospectus: The environmental document(s) that approved this sale: Briefly describe additions or changes made to project design during timber sale preparation.
A portion of the Silver Mule Timber Sale Area was burned by the Trail Creek Fire in 2015. A supplemental information report was prepared in 2016 that dropped units burned by the fire from the Timber Sale.
information report was prepared in 2010 that dropped drifts burned by the fire from the Timber Gale.

EROSION CONTROL

Seed mix is to be included in C(T)6.601# - Erosion Control Seeding and Special Project Specifications (SPS) 625.05 in Road Package.

Make sure that the seed mix and fertilizer are the same in both Contract and Road Package.

Site specific areas, such as gravel pits and very dry sites may call for more and/or different species in the mix. Document below the rational for deviation from the standard seed mix.

Species of Seed	Pounds per Acre
Slender Wheatgrass	6
Mountain Brome	9
Bluebunch Wheatgrass	4
Blue Wildrye	5
	0
TOTAL	24

Scarification - Landings and Skid Trails ONLY

Type of Fertilizer	Pounds per Acre

OTHER CONTRACTUAL REQUIREMENTS (B)

The cost allowance for herbicide application has been based on the following assumptions; 300 gallon sprayer with herbicide injectors (not tank mixed); 20 gallon of carrier/ac; one trip will be required for each herbicide per road; labor rate and production includes mix, loading, cleanup and daily documentation; misc. expenses include equipment maintenance and depreciation, herbicide storage and handling and licensing fees. One mile of road with an average ROW of 30 feet is equal to 3.6 acres. Herbicides approved for use are listed in K-G.2.7# under Technical Spraying Specifications.
